Professional Summary

Senior Android Developer with 8+ years of experience architecting high-scale, production-grade mobile applications across banking, payments (FinTech), and enterprise AI domains. Proven track record building native Android and hybrid WebView-based features for applications serving 50M+ users, including ICICI iMobile, GCash Super App, and EnterCard. Skilled in Kotlin, Jetpack Compose, Clean Architecture, MVVM, JavaScript Bridge / hybrid app integration, Google Maps and Geofencing, and adaptive video streaming with ExoPlayer and HLS. Experienced in leading developer pods, driving legacy modernization, and maintaining 99.9% crash-free production stability.

Technical Skills

Languages: Kotlin, Java

Android & UI: Android SDK, Jetpack Compose, Material Design, XML Layouts, Coroutines, Flow, StateFlow, RxJava

Architecture: Clean Architecture, MVVM, MVP, MVC, Repository Pattern, SOLID Principles, Modularization

Dependency Injection: Hilt, Dagger 2

Networking & APIs: Retrofit 2, RESTful APIs, GraphQL, WebSockets

Database & Storage: Room Database, SQLite, ObjectBox, Offline-First Design

Hybrid & Web Integration: WebView, JavaScript Bridge, Native JS Plugin Architecture, HTML5/CSS (basic)

Location & Media: Google Maps SDK, Geofencing, ExoPlayer, HLS Adaptive Streaming

Machine Learning: TensorFlow Lite (TFLite), On-Device Edge ML, AutoML

Cloud & Backend Services: Firebase, Google Cloud Platform (GCP), AWS

Testing: JUnit 5, Espresso, Mockito, TDD, UI Testing

CI/CD & Tools: Jenkins, Git, GitHub, GitLab CI/CD, Gradle, Fastlane

Security & Quality: OAuth2, JWT, Biometric Prompt, Encryption, Crashlytics, R8/ProGuard, Performance Optimization

AI-Assisted Engineering: Cursor AI, Claude, ChatGPT, Codex

Methodologies: Agile, Scrum, Jira, Full Software Development Lifecycle (SDLC)

Professional Experience

Perennial Systems

Dec 2024 – Present

Senior Android Developer & Team Lead

Mumbai

- Spearheaded Android feature development for core GCash Super App modules (GTourist, Digital Tax Refund, Request Payment) using Kotlin, Jetpack Compose, and MVVM Clean Architecture.
- Architected the migration of legacy GCash payment modules from Java/MVP to Kotlin/MVVM, reducing technical debt by 30% and improving testability and scalability.
- Built and maintained JavaScript Bridge integrations and native JS Plugin components binding WebView-hosted modules to native Android functionality, enabling secure native-web interoperability within hybrid app flows.
- Steered cross-domain coordination across backend, iOS, UI/UX, and QA teams, delivering 100% of sprint milestones on time through structured Agile planning.

Tata Consultancy Services

May 2023 – Dec 2024

Information Technology Analyst (Senior Android Developer)

Mumbai

- Directed Android feature engineering for the official ICICI iMobile banking app, encompassing 400+ financial services and serving 50M+ active users.
- Engineered a reusable internal design system (DFF), published as Maven packages, reducing UI integration time by 40% across teams.
- Managed a pod of 3 developers, enforcing PR review standards and GitLab branching strategy, maintaining a 99.9% crash-free production rate.

Capgemini India Ltd

July 2021 – May 2023

Software Development Consultant

Mumbai

- Led the Android developer pod for the EnterCard (re:member) credit card and financial management app, driving feature

rollouts for 500,000+ active cardholders across Scandinavia.

- Drove a full architecture overhaul from Java to Kotlin and legacy patterns to MVVM, improving app launch speed by 20%.
- Integrated Google Maps SDK with custom geofencing logic to power location-aware features, enabling real-time proximity detection and location-triggered notifications.
- Developed JavaScript Bridge solutions and native JS Plugins binding WebView components to native modules, enabling seamless native-web interoperability for hybrid app features.
- Implemented FigmaToken integrations for design-system consistency and resolved 40+ critical technical debt issues during a rapid-response support initiative for Ola Electric.

Proteus Technologies Pvt Ltd

July 2019 – June 2021

Software Programmer

Mumbai

- Sole Android developer architecting 3 enterprise applications from scratch: Proteus Vision (CRM), Vision Sense (TensorFlow Lite computer vision), and Vision Moment.
- Integrated TensorFlow Lite models for real-time edge computer vision, object classification, and low-latency offline sensor processing.
- Built native JS Plugin architecture bridging WebView-based modules with native Android functionality for hybrid application features.
- Leveraged Crashlytics and RoomDB offline caching to reduce application crash rates by over 50%.

Affalatus Creative Solutions Ltd

Mar 2018 – July 2019

Android Developer

Mumbai

- Developed Complete Wallet, a payments and bill-payment application, coordinating with backend teams for API and third-party payment gateway integration.
- Migrated legacy projects to the latest Android SDK, resolving migration-related compatibility issues.

Keights India Technology

Apr 2017 – Mar 2018

Android Developer

Mumbai

- Developed core features of Y Chat, a social media application, including image/text posts, group and one-to-one chat, and audio/video calls.
- Utilized Java, XMPP Ejabberd server for real-time chat, and Twilio API for audio/video calling.

Independent Projects

OTT Video Streaming Platform

Android Developer

- Implemented adaptive bitrate video streaming using ExoPlayer with HLS support, optimizing playback performance and buffering behavior across variable network conditions.
- Built player UI and playback state handling for an independent OTT media platform.

Education

University of Mumbai

2019 – 2021

Master of Science, Information Technology (M.Sc. IT)

Mumbai

University of Mumbai

2014 – 2017

Bachelor of Science, Information Technology (B.Sc. IT)

Mumbai

Certifications

- Cutshort Certified Java – Advanced
- CutShort Certified Android Development – Basic
- Agile Software Development – Coursera
- Agile with Atlassian Jira – Coursera
